

Learn to make Pysanky

Ukrainian Egg Decorating 4 Fun

Pysanka : the Ukrainian Easter Egg

The colourful **pysanka** (Ukrainian Easter Egg) holds a unique place in Ukrainian folk art. In the tradition that has been handed down through generations, designs are made on a real egg with beeswax and a specialized tool designed to be used with a candle (called a "kistka"). The egg is emersed into a succession of dye baths. The area that has beeswax on it is protected from the dye. When the beeswax is melted and wiped off at the end of the process, the beautiful colours of the pysanka are revealed.

How to Protect and Display Your Pysanka

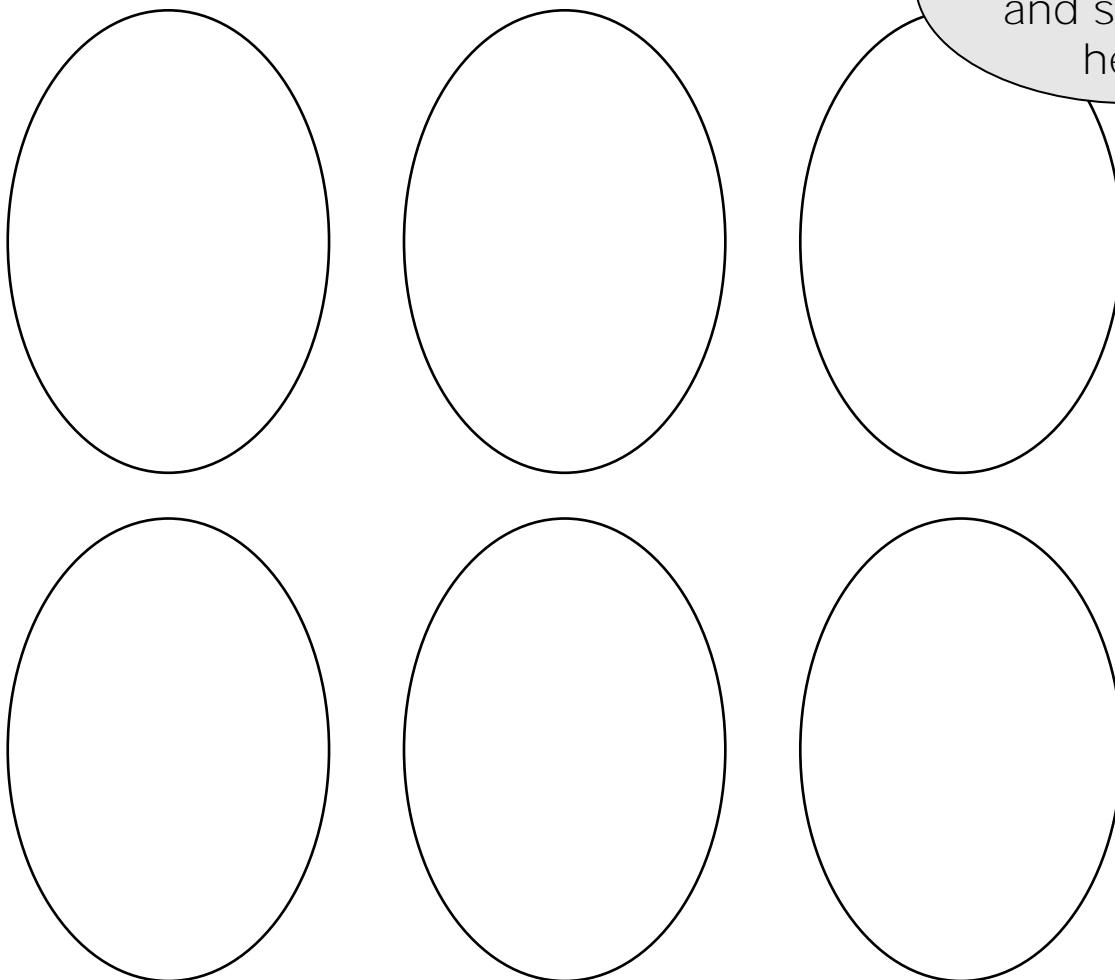

Your pysanka will last forever if displayed with care. Emptying the egg is optional. Keep your pysanka away from heat or direct light. You can polish it with a light coat of vegetable oil.
